

CORPORATE OVERVIEW

Established in 2009, Sugar Hill Consultants (SHC) is a small technology consulting firm that has evolved from a DevSecOps and cloud infrastructure specialist into a full-spectrum AI, MLOps, and AI security engineering partner for private and public sector clients. Our mission is to help clients deploy AI and cloud systems that hold up under real production conditions and real adversarial pressure — not just working demos — while shortening IT workflows through automation, security-first tooling, and disciplined operations to reduce organizational risk.

CORE CAPABILITIES

CONSULTING	DEVELOPMENT	TECHNOLOGY
▸ DevSecOps ▸ MLOps & LLMOps ▸ Agentic AI Security & Governance ▸ Software Integration ▸ Training / Staffing	▸ Technical Training ▸ Developer Onboarding ▸ AI/ML Model Development & Fine-Tuning	▸ Automation, CI, and Testing ▸ Cloud ▸ Release & Configuration Management ▸ Source / Version Control ▸ Security ▸ Infrastructure as Code ▸ AI Model Observability & Drift Detection ▸ Adversarial AI Testing & Red-Teaming ▸ AI Governance & Regulatory Compliance

WHAT CAN WE DO FOR YOU?

- Build CI/CD pipelines with automated model registries, drift detection, and retraining
- Design and secure multi-agent AI systems with enforced authorization controls
- Conduct adversarial testing on AI/LLM systems using industry-standard tooling (PyRIT)
- Support federal AI/ML deployments requiring NIST RMF alignment or ATO pursuit
- Modernize legacy DevSecOps pipelines for cloud-native, AI-integrated workflows

PAST PERFORMANCE

ENGAGEMENT	VALUE
SAIC / DARPA — DevSecOps pipeline and repository management	\$601,200
Pfizer — GitHub DevSecOps pipeline, including security gate additions	\$95,680
Salesforce — DevOps Heroku pipeline and repository management	\$97,000
RPS / NRO — DevSecOps pipeline refactoring	\$182,000
